

PFOTENBALSAM

Protects and cares for the paws

We all know that the skin is subject to extreme stress in cold and wet conditions. This is especially true of our pets who walk about outside without any protection for their paws.

The benefits of Anifit Paw Balm are twofold:

A **fine protective layer**, formed by the delicate Anifit Paw Balm, protects your pet's sensitive paws from the harsh conditions of the outdoors during winter. Snow, salt and grit often accumulate in gaps between the balls of the feet and result in areas of abrasion which could lead to inflammation.

The paws are treated with **active nutrients** to ensure that they remain hydrated allowing for rapid regeneration. The skin does not become dry or irritated. Damaged areas are treated with care.

- with beeswax and propolis
- purely natural nutrients
- free from colourings
- free from preservatives.
- pharmaceutical quality
-

Application

Rub into the paws before and after a walk.

Ingredients

Liquid paraffin, paraffin (solid), petroleum, lanolin, cera alba (beeswax), copernicia cerifera cera, alcohol, propolis cera (= propolis from bees)

Product information

100 ml tin
